

ABSTRACT OF THE DISCLOSURE

An information distribution system ~~including~~ includes a distribution server ~~102~~ which distributes information, and distribution terminals ~~14 to 16~~ each of which receives the distribution information ~~distributed from the distribution server~~ and outputs the distribution information from a user interface ~~means~~ in a predetermined output form, wherein the distribution information includes an object information element ~~which is an object of the distribution and an objective of the output~~, and a control information element which controls the user interface ~~means~~ so as to return response information to the distribution server, the response information being generated by a user in response to the distributed object information element, and each of the distribution terminals ~~14 to 16~~ includes a user interface control ~~means~~ for controlling the user interface ~~means~~ in accordance with ~~a content of~~ the control information element so as to return the response information to the distribution server ~~102~~, and medium output ~~means~~ for outputting the object information element of the received distribution information ~~in the form of recording on a predetermined recording medium~~.

ABSTRACT OF THE DISCLOSURE

An information distribution system includes a distribution server which distributes information, and distribution terminals each of which receives the distribution information and outputs the distribution information from a user interface in a predetermined output form, wherein the distribution information includes an object information element and a control information element which controls the user interface so as to return response information to the distribution server, the response information being generated by a user in response to the distributed object information element, and each of the distribution terminals includes a user interface control for controlling the user interface in accordance with the control information element so as to return the response information to the distribution server, and medium output for outputting the object information element of the received distribution information on a recording medium.
